Model Applicability

Aircraft Model	J-160	J-170	J-230	J-430
Document Applicability	Yes	Yes	Yes	Yes

Pre-Paint>Fuselage>Firewall forward>Fit ram air cooling ducts>Procedure

The fitting of Ram-air cooling duct is most conveniently completed after the engine has been fitted to the aircraft firewall.

In all Jabiru aircraft models the ram-air cooling ducts are a standard tractor configuration and all follow the same procedure.

Installation instructions are provided in the relevant engine installation manual. For Jabiru Generation 4 engines this is JEM0008 (always use the most recent issue).

This completes the *Pre-Paint>Fuselage>Firewall forward>Fit ram air cooling ducts* task.
